

how.to.explore.the.world.of.fun...

To enjoy the art and entertainment you can either use the great **Graphic User Interface (GUI)** exclusively made for this both Cds or you can use your favourite tools like NC to explore the world of the digital underground. For viewing the graphics and playing the music modules we included the worlds best dos tools: **SEA View 1.2c** (Shareware) is able to display all all common graphic formats in all resolutions on most graphic cards and **Cubic Player 1.7** is the worlds very best dos music player supporting all module formats and most soundcards around. Both tools are integrated in the GUI, but they can be runned seperately as well. You can find 'em in the \GUI\ directory on both Cds.

To run the SCENE 96 GUI directly from the CD, just change to your CD-ROM drive and run **start.bat**.

To install the SCENE 96 GUI to your Harddrive, change to your CD-ROM drive, go into the "GUI" directory and run the **start.exe** file with the commandline parameter of the drive and path, you want to install the GUI to. E.g. use...

```
start.exe C:\SCENE96
```

...to install the whole GUI (including subdirectories) to the "SCENE96" directory on drive C: (if the specified path doesn't exist already, it'll be created automatically). After installation you can run the GUI from your Harddrive by running the "start.exe" in the specified path. Running the GUI from HD will increase the speed and the comfort, as e.g. "Cubic Player" can save the configuration file now.

By running the GUI for the first time on your PC you can choose between **ENGLISH** and **GERMAN** language. Just choose the one you prefer. The configuration file "scene96.cfg" will be created in the root directory of drive C:.

The GUI itself is an easy-to-use SVGA-Interface coded by Björn Schnizler a.k.a. Climax*Amable and designed by M. Flache a.k.a. Slash*Amable. You can use it by mouse and by keyboard. You'll get all infos about the usage of the GUI by pressing < F1 > in the main screen or by pushing the < INFO > button with the left mouse button.

System Requirements: PC 386 (with co-pro) or higher, CD-ROM drive, 4 MB RAM, VESA compatible graphic card

SCENE 96

international edition

introduction...

Nearly one year after the release of the "Hot SceneStuff CD" we are proud to present our second scene/underground related cd-rom. This time we collected nearly 3000 mb of scene stuff and took the best 1300 mb out of it to fill this both cd-roms. It was impossible to put everything made in 1996 on only two cds, but we tried to choose the best releases made between late 1995 and early 1997. If you miss some great productions - sorry - it might be, that they were hard to get or the group didn't allowed us to put it on cd-rom. Anyway, this is definitely the best scene related cd-rom on this planet at the moment and you can look forward for future productions (cd-roms or dvds) from ZYKLOP. If you want to stay informed about our projects and offers, just tell us your e-mail or snail address and your mailbox will be flooded with the latest infos from us :). See below how to contact us. We wish you great fun and enjoyment with this both cds!

problems.and disclaimer...

Many productions, especially the demos on the cds are hardware sensible and coded close to system, so there is no warranty, that all prodctions will run on your configuration without problems. Some programs cannot be started from cd-rom, so just copy 'em to your harddrive before running. The producers are in no way responsible for any damages, loss of information or interruption of business caused by the usage of these cd-roms and its software. Both cds have been checked for viruses and trojans with the latest anti-virus-tools available, but it's never absolutely sure, that there is no virus on a cd-rom. But don't care - just go ahead and enjoy the cds!

how.to.contact.us...

To get in contact with us for any reason, especially commercial purposes, you can reach us by mail, voice, fax and e-mail (preferred) as followed. Don't hesitate to tell us your opinions or ideas as well as the latest rumors and news:

...a.short.overview

< disc one >

Disc one contains 640 MB of uncompressed files, classified in eight directories as followed:

- \DEMOS\ - more than 200 of the best demos classified according to the parties they've been released on [400 MB]
- \DISKMAGS\ - nearly all international / german diskmag and newsletters released since january '96 [80 MB]
- \EMULATOR\ - about 100 disks with demos/mags/slideshows from C-64 and Amiga - incl. the best emulators [28 MB]
- \GAMES\ - cool pc games out of the scene as well as useful tools (cheating/cracking) and some add-ons [30 MB]
- \GUI\ - contains the great User Interface (see cover backside) and the belonging viewing and playing programs [5 MB]
- \INTROS\ - a huge collection of intros ("small demos") classified according to their size (4kb, 64kb, 80kb ect.) [15 MB]
- \PARTY\ - all available files about 1996 and '97 computer parties like reports, results, photos & invitation intros [85 MB]
- \TEXT\ - many textfiles in english and german bringing you useful infos, textual fun and a lot of useless crap [6 MB]

< disc two >

Disc two also contains 640 MB of uncompressed files, classified in ten directories as followed:

- \GRAPHICS\ - thousands of handpixeled & raytraced graphics as well as artpacks, slideshows and nice tools [175 MB]
- \GUI\ - contains the great User Interface (see cover backside) and the belonging viewing and playing programs [5 MB]
- \MISC\ - miscellaneous stuff like source codes, drivers, scene utilities, anti-virus tools and bbs-add-ons [40 MB]
- \MUSIC\ - hundreds of single music releases from 40 different music crews and several parties [200 MB]
- \MUSICDSK\ - 14 high quality music disks with integrated music player and user interface [60 MB]
- \MUSICPCK\ - a huge collection of music packs without any interface [120 MB]
- \PLAYER\ - the worlds best music players for dos and windows collected in this directory [6 MB]
- \PROGRAMS\ - all kinds of music tools like rippers, converters, emulators and cd-players [3 MB]
- \SAMPLES\ - a great selection of samples for free use in your own music tracks [23 MB]
- \TRACKER\ - the latest trackers for composing your own music tracks - try it on your own! [6 MB]

Beside the production of high quality scene and underground cd-roms, ZYKLOP supports the scene with another great service. ZYKLOP MailOrder the worlds first scene related mailorder service offering a selection of kewls scene cd-roms, underground-audio-cds, scene related hardware and in the future maybe also a collection of shirts and fashion. All mentioned items are offered very cheap, 'cause most sceners are always out of money ;).

Below you can find a small selection of our offer. To stay informed about our latest (special) offers, just give us your mail and e-mail address and you'll get the latest news via e-mail plus printed flyers or prospects via snail mail from time to time. In some countries we have even co-distributors to increase the speed and the comfort of the delivery. Just contact ZYKLOP Germany first - we will forward your to your local distro, if there is any in your country.

Hot SceneStuff CD

The first cd-rom by ZYKLOP released in spring '96 containing more than 600 mbs of great intros, demos (the best stuff from Assembly, The Party 4, SH'95 and Wired '95), a huge collection of scene related diskmags, some nice graphics, many underground tools (rippers, intromakers, unpackers), a lot of music tracks and discs as well as a selection of samples, players and trackers. Including a really nice user interface with integrated players and viewers. The quality of the whole cd is far away from the our latest production "SCENE 98 CD" but it's really worth to have it in your collection!

11,95 US\$
= 19.80 DM

Groovy Bytes CD

"Groovy Bytes" is a mainly music related cd-rom produced by FCC. Nearly 100 hour of mindblowing music (>400 mb) tracks from the best european pc music crews like AZURE SKY, EMS, HBE, PAIN, SKY JUMP TEAM, MoM - expect tons of techno/ambient/goa/hardcore/acid/breakbeat/trance modules. Additionally there are many demos, intros, pps, ansi-stuff, diskmag and textfiles as well as a lot of other music related stuff like samples (more than 1500), trackers and players. As a bonus the cd-rom contains a nice rave-dance-video and tons of scanned party flyers. Music fans - don't miss!

11,95 US\$
= 19.80 DM

Assembly CD

The official cd-rom of the biggest computer meeting '94 - the Assembly nearly for free now! The classic scene cd containing all demos, intros, graphics and musics for pc, amiga & c-64 from the party as well as digitalized pictures, videos and detailed infos about the event. Additionally you'll find source-codes, a great svga-user-interface and all releases of the legendary Future Crew on this disc. A must for every fan of timeless art and entertainment and a nice collection of "old school" stuff. The cd-rom is pc- and amiga-compatible and comes in the original jewelcase. EXTREMELY CHEAP!

8,95 US\$
= 14.80 DM

ZYKLOP MailOrder distributes officially the great audio-cds by TRSi Recordz - the underground music label of the pc- and amiga-scene. The best composers out of the scene contribute with their very best tracks, recorded in a commercial music studio. TRSi Rec. is a (legal) division of the legendary art and pirate crew, well known on pc and amiga. Famous musicians, like Skorpik^Absolute^Pulse, Dr.Awesome^Crusaders, Chromag^Rebels and Groo^CNCD, Cortex, Boosta, Hi-Lite^TRSi^Scoopex and Reanimator^TRSi contributed with high quality tracks made on pc or amiga. Great work!

X2 CD - a absolutely great soundtrack cd by Dr.Awesome^Crusaders^Team17 - detailed infos in this booklet - 72 min
CNCD CD - one of Finland's best underground techno cds by the masters of the famous amiga/pc-crew CNCD - 60 min
Cyberlogik - back to the roots - a techno compilation of well known composers - a little on the heavy side - 60 min.
Cyberlogik 2.00 - the next step - ever better, even fatter, even more fantastic - 12-page-booklet - 74 min - wow!
Cyberlogik 3.11 - a trancy injection into your mindflow - the very latest ('97) release! experimental hardtrance - 72 min

For more detailed descriptions of the audio-cds above, just request our latest prospects or take a look at TRSi Recordz' HomePage. You can also get more infos from us via e-mail. The backside of this page is filled with details and statements about the marvelous X2 CD!

order.conditions...

You can order the listed (and even many more) items from us via mail, fax, phone and e-mail. Most of the listed cds are more or less limited - so before a cd is sold out, better order it early. We deliver as fast as possible, via surfac mail from Rostock, Germany. The international forwarding expenses are charged with US\$ 5 a sending - alike how many stuff you order or where on the globe you live. You can pay the total sum in US\$ or in DM (German Marks); the exchange rate is 1 : 1,60 at the moment. If you wanna pay in another currency, please ask us before. You can pay via cash money, money transfer or credit card. We accept VISA, Amex and Diners. If you send cash money, try to hide it well in the envelope. For money transfer ask us for our account datas. For credit card deals we need your card number and your validity date. The prices are including taxes in Germany and EU countries. There is no order minimum! Test and recommend us!

Bjorn Lynne a.k.a. Dr.Awesome

The X2 CD has been released by Bjorn Lynne under his pseudonym "Dr.Awesome". This handle is very well known in pc- and especially in amiga scene as one of the best composers ever and as a member of the legendary amiga crew Crusaders. His old tracks are already classic and they were used in many amiga/pc/console-games in the past. Today "Dr.Awesome" works for Team17 successfully as a game musician and he's responsible for the great music the latest game X2!

some "cheap" samples of dr.awesome's music are stored in MUSIC\DRAWESME\... dir on CD 2!

Dr. Awesome

music from and inspired by the game

X2

X2 CD by Team17 & TRSi Recordz

The X2 CD is the official soundtrack cd of the spectacular saturn/playstation/pc-game X2. It's an explosive techno/trance/goa supercharged album containing the best tracks out of the game and several additional bonus tracks. Heavy, hairy, dirty, hard-biting guitar riffs are used together with blood-pumping, adrenalin-boosting techno/rave/goa-rhythms and deep / low sub-bases (take care for your speakers!). Magazines across europe reviewed it as the best soundtrack-cd ever!

[Germany], Vacuum [Germany], Voodoo [Germany], Wicked [International], XXL [Germany] and of course ZYKLOP [Germany] and TRSi [International]. Thanks to all of 'em!

looking-for-talents...

Hello talented sceners out there! We are looking for you! If you are a very good coder, composer, graphician, raytracer or 3ds-modeler contact us with some samples of your work. Alike if you are independent or a member of a well known group, as long as you are a talented scener, you should contact ZYKLOP to get mediated to a software company ect. As we are often asked by game companies for talents out of the scene, we can try to mediate even you. It's free - so just try it!

ultrasound-for-best-quality..

As you've probably already noticed, most scene productions support the GRAVIS Ultrasound for best sound and music quality. It's the standard of the scene today, so don't torture your ears with an old soundblaster, but upgrade to a GRAVIS Ultrasound. You can get it directly from ZYKLOP MailOrder for extremely fair prices - ask us for 'em and for delivery conditions. Join the selection of elite dudes using an Ultrasound NOW!
