# TOWERS OF HANOI

BY LOGIKER

Category: 256 Bytes Game

System: C64, BASIC V2

Short Description: A C64 BASIC Game with PETSCII Graphics that implements Tower of Hanoi

THE GAME

The game towers of Hanoi is well known. It's a puzzle with three rods. One rod is filled with several disks. It is your task to move the disks form one rod to another one. There are two additional rules: You can only move one disk at one time. A disk can only be placed on an empty rod or on a smaller disk.

HOW TO PLAY

You have to move all disks to the third rod. Move your disks by typing <from>,<to> followed by enter. To move a disk from rod 1 to rod 3 you would type: "1,3" without quotes and followed by enter.

COMMENTS

- 255 Bytes including starting address and final bytes
- No file optimization done/needed
