1. What is Free YouTube Downloader?

Free YouTube Downloader is a free powerful software utility that will help you to download and manage your favorite video files from YouTube. The software runs in Windows, Linux, Solaris and MacOS.

2. What are the key features of the Free YouTube Downloader?

The most important features are:

- absolutely unique feature that makes it possible to extract video files names from the YouTube website,
- multiple downloads during one program session,
- Easy to use graphical user interface,
- Suspending downloads,
- Html download report file

3. What are the system requirements for Free YouTube Downloader?

Since YTD is entirely written in Java it requires Java Runtime Environment Standard Edition (JRE SE) installed on your computer. The minimum required Java version is **1.5**.

4. How to launch Free YouTube Downloader?

Usually it is enough to double-click on the `ytd.jar`. The other method is to type in the command-line: `java -jar ytd.jar`

5. How to use Free YouTube Downloader?

The Free YouTube Downloader is an easy-to-use application. Simply, paste YouTube links in the appropriate text field and then click "Download" button. The YouTube link is the one you can see in your Internet browser address bar (see example below).

6. Does Free YouTube Downloader support non-English languages?

Currently Free YouTube Downloader supports English. If you are fluent in a non-English language and would like to translate Free YouTube Downloader, send a message (including your e-mail) to me using "Contact the author" menu in the program. As a reward I will add a link to your website.

7. About the developers

The chief developer is Rafał Frączek.

8. Future Development

All your feedback (comments, feature requests, bug reports, etc.) is appreciated. If you would like to e-mail your feedback, send it to Rafał Frączek.

9. Project history
